

Reforestation & Plantation Monitoring Checklist

Forestry & Environmental Project

REFORESTATION & PLANTATION MONITORING – HIGH PRIORITY

Plantation sites are selected based on suitability and environmental planning.

☐ Yes☐ No☐ NA

Native and region-appropriate species are selected for plantation.

☐ Yes☐ No☐ NA

Saplings are sourced from certified, disease-free nurseries.

☐ Yes☐ No☐ NA

Plantation density and spacing follow approved forestry standards.

☐ Yes☐ No☐ NA

Soil treatment or preparation has been completed before planting.

☐ Yes☐ No☐ NA

Planting is done during the appropriate seasonal window.

☐ Yes☐ No☐ NA

Watering systems are in place and functional.

☐ Yes☐ No☐ NA

Mulching is practiced to retain soil moisture.

Yes

No

NA

Fertilizer usage follows eco-safe standards.

Yes

No

NA

Sapling tags, maps, or digital logs are maintained for tracking.

Yes

No

NA

Sapling survival rates are monitored periodically.

Yes

No

NA

Damaged or dead saplings are replaced promptly.

Yes

No

NA

Protection measures against grazing animals are applied.

Yes

No

NA

Fire control lines and preventive measures are maintained.

Yes

No

NA

Pest and disease monitoring protocols are in place.

Yes

No

NA

Controlled weeding is carried out to prevent competition.

Yes

No

NA

Shade and wind protection is provided where necessary.

Yes

No

NA

Access paths to plantation zones are safe and maintained.

Yes

No

NA

Soil erosion control structures are functioning.

Yes

No

NA

Water runoff does not damage young plants.

Yes

No

NA

Plantation records include growth measurements.

Yes

No

NA

Seasonal care and special maintenance activities are performed.

Yes

No

NA

Plantation area signage and boundary markers are in place.

Yes

No

NA

Plantation activity complies with environmental regulations.

Yes

No

NA

Maintenance staff are trained in nursery and plantation practices.

Yes

No

NA

Community involvement programs are implemented.

☐ Yes☐ No☐ NA

Plantation areas are free from encroachment or unauthorized activity.

☐ Yes☐ No☐ NA

Plantation contributes to biodiversity restoration goals.

☐ Yes☐ No☐ NA

Climatic and soil monitoring is done at periodic intervals.

☐ Yes☐ No☐ NA

All plantation monitoring records are updated and centrally maintained.
