

# Biodiversity & Wildlife Protection Checklist

## Forestry & Environmental Project

### BIODIVERSITY & WILDLIFE PROTECTION – HIGH PRIORITY

Wildlife habitats within the project area are identified and mapped.

☐ Yes☐ No☐ NA

No construction or harvesting activities occur in critical wildlife zones.

☐ Yes☐ No☐ NA

Endangered and protected species are identified and monitored.

☐ Yes☐ No☐ NA

Hunting, poaching, or wildlife disturbance is strictly prohibited.

☐ Yes☐ No☐ NA

Wildlife corridors are maintained and unobstructed.

☐ Yes☐ No☐ NA

Artificial lighting is minimized in wildlife-sensitive areas.

☐ Yes☐ No☐ NA

Noise levels are controlled to avoid disturbance to wildlife.

☐ Yes☐ No☐ NA

Nesting, breeding, and roosting sites are protected.

☐ Yes☐ No☐ NA

Water bodies are free from contamination and chemical runoff.

☐ Yes☐ No☐ NA

Fishing or aquatic resource extraction follows approved limits.

☐ Yes☐ No☐ NA

Deadwood and natural microhabitats are conserved where ecologically required.

☐ Yes☐ No☐ NA

Invasive plant or animal species are monitored and controlled.

☐ Yes☐ No☐ NA

Native vegetation cover is preserved and restored.

☐ Yes☐ No☐ NA

Grazing activities are regulated to prevent habitat degradation.

☐ Yes☐ No☐ NA

Fire management and prevention systems protect wildlife habitats.

☐ Yes☐ No☐ NA

Water sources for wildlife are maintained and accessible.

☐ Yes☐ No☐ NA

Vegetation buffers are maintained along rivers and wetlands.

☐

Yes

☐

No

☐

NA

Organic and eco-safe pest control methods are used.

☐

Yes

☐

No

☐

NA

Waste disposal practices prevent harm to wildlife.

☐

Yes

☐

No

☐

NA

Road use inside the project follows wildlife-safe speed limits.

☐

Yes

☐

No

☐

NA

Wildlife crossings/signage are installed where necessary.

☐

Yes

☐

No

☐

NA

Staff and workers receive wildlife protection training.

☐

Yes

☐

No

☐

NA

Community awareness programs on biodiversity conservation are active.

☐

Yes

☐

No

☐

NA

Patrols and monitoring activities are conducted regularly.

☐

Yes

☐

No

☐

NA

Biodiversity monitoring records are maintained and updated.

☐

Yes

☐

No

☐

NA

Chemical pesticides/herbicides are avoided in nearby buffer zones.

Yes

No

NA

Habitat restoration is performed after construction/harvesting activities.

Yes

No

NA

No unauthorized settlement, grazing, or encroachment is occurring.

Yes

No

NA

Climate and habitat-related risks are assessed periodically.

Yes

No

NA

All biodiversity protection documentation is centrally maintained.

Yes

No
